Mission Statement

"We who cut mere stones must always be envisioning cathedrals."
- Quarry worker's creed

EDUCATION

Wyncode Academy, Fort Lauderdale FL
Primarily worked on front end technologies and Ruby on Rails

PC Professor, Boca Raton FL
Enlarged my skill set relating to web design; photoshop and illustrator.
Improved knowledge relating to front end technologies.

KEY SKILLS

JavaScript
Vue
Nuxt
Node
Express
C#
T-SQL
MySQL
HTML
CSS
Git
Azure
Heroku

EXPERIENCE

11/2015 - Current
Software Developer • Consultant • Third Wave IT
 I have worked on a number of different projects and tech stacks solving business challenges. I have proven myself to be productive on every level. Serving as a DB architect, developing APIs and creating intuitive view layers.

07/2015 – 11/2015
Software Developer • Contractor • View Thought
 I worked on two separate projects, both built in Rails. One of which was developing the view layer for purplecarrot.com.

07/2014 – 08/2015
Software Developer • Real Estate Supplies and Services
 This is where I got my start. I began as an assistant at the company and worked my way up to managing their ecommerce platform and creating marketing emails.

COMMUNICATION

I believe that one of my most valuable skills is my ability to understand and refine client's objectives. Not seeking solutions but seeking to refine questions, the solution shows itself to be obvious and simple. They trust me and understand that we are on the same team. I also do my upmost to convey the importance of code maintenance; testing, refactoring and CI/CD.
I have done well at the other end of the spectrum as well. Guiding teams of very intelligent and sometimes difficult software developers. Communicating with them in a way that allows me to ask their help and makes them comfortable asking for mine.
